PUBLISHERS' NOTE.

We present to the Profession & the Public interested in Homœopathy this booklet entitled "Drug Relationship" an extract from "Knerr's Repertory."

Knerr's book does not require any introduction at our hands. There was and is a great want of such a book, and we hope that this Publication of ours will remove the want to some extent.

Calcutta, August 1944.

M. BHATTACHARYA & CO.

PREFACE TO THE SECOND EDITION.

The Second Edition of Drug Relationship is published with the valuable addition of Modalities—aggravation and amelioration—against each medicine. This useful addition, we hope, makes the book more helpful in selecting medicine according to the susceptibility of individual patient.

Calcutta, August 1944.

M. BHATTACHARYA & CO.

SIGNS.

- | designates an occasionally confirmed symptoms.
- || designates a symptoms more frequently confined, or, if but once confirmed, strictly in character with the genius of the remedy.
- ! designate the symptoms verified by cures.
- !! designate the symptoms repeatedly verified.
- ☞ directs in cross-reference to related Drugs.
