

12th SSMS On Noble Metals, Feb 4, 2007

Reports written by the delegates who attended the 12th Sarla Sonawal Memorial Seminar. Some reports do not carry names, though oversight, so given as anonymous

Compiled by : DR SUSHMA JAISWAL

The 12th Sarla Sonawala Memorial Seminar was held at Ravindra Natya Mandir, on 4th February. Very well attended by about 600 delegates. Most of the papers given in the seminar will be covered in the next issue. This issue will carry the report and the comments of the delegates.

ABSTRACTS GIVEN BELOW

Well organized. Noble metal nicely presented by all experts of homoeopathy. Patient's Relationship Management by Dr Asrani was useful in all aspect. Such seminar should be conducted at least 3-4 times a year. We come close to stalwarts of homoeopathy. Organizers have done an excellent work for all of us.

Thanks to NJH Team, especially to Dr Vishpala Parthasarathy.

Dr P L SAMPAT, Mumbai

The conference on Noble metals was educative. Learnt a lot. The comparisons were good. Hints regarding the Patients Relationship Management were quite inspiring which can be applied to practice.

ANONYMOUS

The pre-lunch seminar was really appreciable. We've got a very precise idea about the metals. Dr Vishpala has really taken efforts for making this seminar a successful one. We all should appreciate her efforts. Dr Ajit Kulkarni has presented, "Study of *Arg-nit* in a very interesting manner. Every speaker has taken good efforts and the whole seminar was an inspiring and informative.

NIKHIL KULKARNI

Feel very precious attending this seminar. Used to be confused while differentiating remedies, but it has given me ideas for clear selection, maintaining

patients relationship in clinics. I am thankful to NJH institution that has brought higher influenti changes in homoeopathy and giving this knowledge. Also thanks for delicious lunch and nashta!!

MS JYOTI JUNGHARE, AHMEDNAGAR.

Heartful Thanks to "NJH Team". We all 'budding homoeopath', surely get a plenty of boost to become 'Good Healers' in the field of medicine. All speakers are really appreciated especially the Dr Vishpala Madam and Dr Praveen Kumar.

SOMNATH GOPALGHARE, AHMEDNAGAR.

Seminar was excellent, was a NOBLE gift. Especially Dr Praveen Kumar and Dr Asrani's presentation. Dr Asrani's thought is very useful in artistic OPD, whether Hom/Allopathy ie How is your OPD presentation, Dr's language, personality, I was really very happy. Last 3 yrs I am subscriber of NJH and have got lot of idea, information about homoeopathy. **Dr VASANT MASAL**, Sangamner. It is difficult to express my feelings in words, but today's seminar was the Best! This was my first NJH Seminar and was really very nice. Topic well selected. In today's world we find in our day to day practice these metals, as today's world comprises people who are more ambitious. Really learnt a lot today and a big, "Thank you!" A great success, keep up this trend in future! We students expect more from you.

A H JOSHI

This was my first seminar and would continue attending!

Dr PUSHKAR A B

Seminar was really very informative, almost covered all points. Today I understood aspects of Noble Metals which I did not know, specifically liked Dr Praveen Kumar.

Dr PRAVIN RUPRABE

Suggestion: if a physician is having good material to speak and present interrupting him we are losing on knowledge.

Dr SHAIKH, Thane

Was motivated, inspired and got a lot of courage from this seminar. On 13/7/02 while getting admission to BHMS cried a lot, but today I feel I was lucky to get admission to BHMS. I got tremendous inspiration, thanks to NJH team from bottom of my heart. Dr BAPU SONAWANE, Ahmednagar

Was a great learning experience. I thoroughly enjoyed the lectures by speakers, Dr Vishpala and Dr F Master. Food and snacks were great too. A good overview was presented. Suggestion: Keep a case solving and study session also.

Dr CHETAN WALAWALKAR,
Mumbai.

Dr Vishpala: A very systematic and analytical presentation, could have stressed more on the lesser known noble metals like *Palladium*. Though I have not treated with *Platina*/*Palladium* in my personal practice, but definitely this talk has enriched my knowledge and widened my understanding of these metals. A lively presentation of cases. Was at her best as usual. Best wishes in her future ventures. You create a platform for successful teachers to impart their knowledge to numerous students like us.

ANONYMOUS

Dr Manoj: Initial part of the speech was too text bookish and monotonous. Case presentation was good. He could have highlighted more on the ego of noble metals the similarities and dissimilarities. The time factor has taken the toll.

ANONYMOUS

Dr Ajit Kulkarni: *Arg-nit* was presented very well. More such case presentations with video clippings required to learn live materia medica.

Dr Praveen Kumar: Good presentation of *Platina*, a good orator with impressive speech

Dr ASHWINI DESALE

All aspects, well covered, right from common understanding to chemical properties and Hom qualities of metals. Speaker Dr Manoj Patel tried to cover the ego of various metals. The entire theoretical presentation covered too basic and details of ego

and ego function found to be lost in basics of it. In subsequent session, Ajit Kulkarni tried to cover ego of various remedies but found that confusion on basic terminology. Psychological ego is different from the Repertorial or Materia Medica ego. But found that people have not understood this basic term at all. Rest of presentation was bookish. Last pre-lunch session by Dr Praveen Kumar understanding *Platina*, very well started but later on found to be restricted. Found, in most of the presentation there was overlapping of topic. Lunch was absolutely delicious and served whole heartedly.

Dr SUNITA NIKUMH

I appreciate you, your institute and also seminars. I am not a member of NJH. I am reading your introductory lectures from my friend's journals, seeing your photographs, I respect you and feel proud of yourself as an Indian Lady Homeopath carrying out such a nice, knowledgeable and enthusiastic institute and seminars. It was amazing, above my expectations.

RAJASHREE HAPASE, FINAL YR, KMHMC,
AHMEDNAGAR.

Feels very nice, specially the sentence you said that you take those topics, which you don't know very deeply and study it for better knowledge and presentation. It was little bit fast, otherwise all arrangements were very nice and comfortable to all.

Ms HEMANGI NAWALE.

I regret for my sharing this if it hurts you! I am sorry, today's celebrities were fabulous with their knowledge and were master of languages. Their experiences might be turning point of their life. But, Madam, few of delegates who presented cases could not make their cases alive, the case which has given turning point to their career, that should be so precious handled and presented which might have motivated us! But alas, I was feeling dead. I was just memorizing the presentation by these delegates the previous year on "Carcinorin." But Dr Vishpala, Dr Praveen Kumar, Dr Rasal, Farokh Master were utmost good and could motivate us. But still enjoyed, learned and experienced

good things inspite of being chilled in Grand hall!
Obliged for being placed here at ultimate!

Ms SUNDECHA PAYAL, AHMEDNAGAR.

A bit disappointed! We are students and this was not taken in consideration. Topics were not described lucidly may be because the time was not enough. Hope next time you will think of students and the subjects be explained a bit in details. Found Dr Praveen Kumar, excellent teacher and wish to hear him in every seminar.

Sessions throughout the day were successful, giving deeper insight and more understanding especially by Dr Vishpala and Dr Kulkarni. Session by Dr Master was also very informative. We would be happy if we could get the powerpoint presentation in a computer CD form to maintain it for long term. The orators face could also be projected on the stage screen for those sitting back.

Dr SACHIN CHANDRE,

AHMEDNAGAR

Seminar contributed to our knowledge and opened a way to study Materia Medica without tears. All the speakers were amazing. I just have a humble request to add more artistic ways and humour in delivering seminars as Dr Rama Hariharan.

Dr MONALISA SANGALE.

Please start the seminar on time so that the speakers do not have to hurry. We would like to learn more through video presentation.

Dr SUNITA PILLAI

Attended NJH Seminar for the 1st time, repented why did I not attend earlier. "*Platina*" by Dr Praveen Kumar was very good, highlighting many important points. Aurum group discussion needed in more details. Case of *Aurum-m-n* by Dr Farukh Master inspired us very much. Start seminar on time so no need to wind up.

Dr RUPALI TANKSALE

Thank you for the very informative seminar. I consider the level of the lectures of an outstanding degree. The general approach of dealing with the subject from the perspective of different speakers really gives me a thorough insight in

these subjects. Sometimes through the information load is too big to be able to completely absorb it. It would be of big support for instance if there were more handouts covering the powerpoint presentation of the speakers. I like India for its practical approach in homeopathy; during the seminar this was shown once again. The almost equal participation of male and female speakers balanced the seminar very well. To finish as a homoeopath from a Western country like Holland, your warm, humble and respectful attitude, including the small ceremonies at the start of every day, is like balm to the soul!

PAUL ALBOS,
NETHERLANDS

Very educative. Noble Metals have been discussed in details especially, *Aurum*, *Arg-nit* and *Platina*. One would appreciate if the later parts of most lectures were shown slowly.

Dr ROSHAN BILLIMORIA,
MUMBAI

Seminar was excellent. Time, less to cover all theoretical part even though speakers were excellent. Overall good. **Dr UTTAM NALAWADE, ALIBAG** Very happy and grateful by attending these seminar. Why I did not come last year! After attending and seeing the environment here about homoeopathy, my spirit wants to do homoeopathic practice and only homoeopathic practice. For that I want to thank all of the presenters and arrangers of this seminar.

MANGESH BAJOD,
AHMEDNAGAR.

Heartily happy and impress by the management and our Sarla Sonawala Seminar Work. Noble metals explained well, knowledgeable, informative. It was my 1st Seminar and I would continuously attend to become a great homoeopath and increase my knowledge.

Mr VICTOR BHANUDAS,
AHMEDNAGAR.
