

What Is Our Worth as Homoeopaths?

STRATEGY – A STARTING POINT:

Since the time of Hahnemann, Homocopathy is constantly giving miraculous, astonishing results in the service of sick. Results are not occasional, accidental or by chance but fully scientific, in accordance with the principles and laws. Still our development in the field does not reflect the excellence of our science. It is our weak point needing serious attention. We must realize that "Homoeopathy is our identity, our dignity." We selected homoeopathy to serve people because we found it most useful and effective even when our patients are disappointed by other system of their choice. our practice confirms this truth again and again.

We must realize this truth and accept a challenge to establish this fact in the minds of our people. This article is intended to initiate this concern in the intellectuals working in the field of homoeopathy.

A CASE OF GALLACTORRHOEA:

While I was on a tour, I received a call from my friend (my real friends are my beloved patients who love me for being a homoeopathic physician.) He asked me to take a new case. A female patient, had abundant flow of milk from an incision made for draining an abscess. She was advised to go for a treatment aiming at suppression of lactation. From the available information [constipation and thirst], I prescribed *Bryonia* 30- one dose and placebo for three days. Once we undertake the responsibility of our patients, we discontinue with unhomeopathic measures.

After three days she had 80% relief of her chief complaint. Pain, inflammation and flow of milk, through the

incision was almost relieved while she continues to feed her 10 day-old infant. So lactation was not suppressed and suffering was relieved. Prior to us, she was under the care of a couple qualified as D.G.O. and M.S. (general surgery), M.CH.(urology). The last prescription was -Inj.Mixogen 2 amp. disposable syringe (5cc) and tab Mixogen 1TDS x 3days.

This treatment is targeting breast physiology abnormally normal function of breast is sacrificed intelligently on the faith that it is in good interest of the concerned in the given situation.

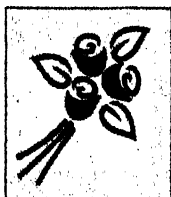

Bryonia took care of lactation, constipation, appetite, sleep and strength of the individual. Hence it is holistic and invigorating. Our result cannot be compared with that of Mixogen, purgative, hypnotic or anxiolytic, enzyme and vitamin preparations etc. and fear of infection is not our concern, once our similimum has initiated curative response. In next four days wound healed completely and in last one month we have not used any medicinal stimulus.

Now, we understand that our case taking, analysis and evaluations was correct and prescription restored the sick to health.

ANALYSIS AND EVALUATION of result:

Now we will try to analyze our result to evaluate our performance. First we understand that suppression of milk is not a palatable solution. This concept is injurious to health of mother and infant. Both are medicines to establish maximum health. " "this particular point is a super speciality of Homeopathy"

No other combination of drugs in any quality and number can give comparable result. Our intention in analyzing and evaluating this result is to establish our authenticity, identity and dignity in the field of health care. The above patients would have accepted "wrong choice" because she was not aware of "right choice". It is our duty to educate the sick community about how

they should make a choice. so that they will pay for proper and real health care only.

At our clinic, we take responsibility of safe, harmless and result oriented health care. We charge for the best health care service offered by us and we do not charge for medicine(s).

The reason to believe our health care as best are:

- 1) We are often consulted (by a new case) at last. it means that they are in search of a better health care quality. To succeed in this situation, again and again in itself is a solid proof of homeopathy being a super specialty.
- 2) We use least medicine (put this in contrast to long list of medicines elsewhere)
- 3) We do not advice wisely [suppress milk, remove the organ out of fear that. . . . disease like cancer may . . . etc.]
- 4) We do not impose diet restrictions and .
- 5) Still we restore health.

Here again we will give little thought to the concept of not charging for medicine(s). Everyone is aware of medicines. Hence if we charge for that we will have to depend on sale of medicine. "sale of medicine will become our basic concern and we will lose our

identity of being able to cure".

Instead of that if we put quality of service as our concern, we will develop in the field. This will put us our field not at par but as an excellent in the field of medicine. Kent, Allen, Boger, Burnett and. . . . Withoukas established themselves on the merits of Homoeopathy. We have to pledge to quality on same grounds not individually but collectively on merits of homeopathy. Please feel free to express your opinions, criticism, queries etc. Your feedback will give me an opportunity for my better contribution. "let us feel grateful to Hahnemann for empowering us to help the sick who are tormented by disease, diet (restrictions) and drugs."

We must free them from disease, drug and diet restrictions. It is a heroic job, which can be achieved by skillful application of scientific homeopathy. Would you like to say with me: "Homeopathy is my identity, my dignity!"

In this article, I have used a very simple case to initiate the subject. In next article we will evaluate our performance in cases of diabetes mellitus. . . . again less of medicine. . . . normalcy of diet and normalcy of health.

Shifting of Disease

SHIFTING OF DISEASE

Kent has given us twelve observations which are very useful for second prescription. His each observation is based on the effect brought about in a patient after giving the first prescription. In my 27 years of clinical experience, I have derived 3 useful **OBSERVATIONS**.

A) PALLIATION: Means temporary cure or partial relief. Palliation can be done by 132 pathies available in this world.

Example:

1) COUGH & COLD

Acupuncture and Acupressure: Pressure points.

Allopathy : Antihistamines, Decongestants

Ayurvedic : Chariyta, Maha-laxmi-vilas-ras

Homoeopathy: *Aconite, Belladonna, Bryonia, Arsenic* etc.

Unani : Gul-banaksha
