

AURUM and ITS SALTS

ABSTRACT: This study of Aurum Group was done with the help of study of the physiological actions of its salts through Burt's Physiological MM. Its a logical interpretation followed by successful practical utilization in my Homoeopathic practice which ultimately helped me to understand the depth of the Aurum salts.

AURUM-METALLICUM

Aurum dominates all its salts showing much of its peculiarities only. If we will study the *Aurum* through the Physiological MM by Burt, we get following characteristics.

AURUM-MET: PHYSIOLOGICAL MM

Through the vegetative nervous system, Gold has six special centres of action:

1. LYMPHATIC GLANDULAR SYSTEM: Congestion and Induration.
2. OSSEOUS SYSTEM: Caries and Exostosis.
3. DIGESTIVE ORGANS: Gastro-Intestinal and Inflammation.
4. VASCULAR SYSTEM: Excited and Raised Temperature.
5. SKIN: Copious diaphoresis.
6. GENERATIVE ORGANS: Passions excited.

....AND REGARDING THE ARS-ALB

ARS-ALB: PHYSIOLOGICAL MM

No known remedy is so quick to strike down and annihilate the life of the ganglionic nervous system as does *Arsenicum*. Through this system, every organ and tissue in the body is more or less affected but most of its action is spent upon the ten following tissues:

1. MUCOUS MEMBRANES: Destructive inflammation.
2. SEROUS MEMBRANES: Oedematous inflammation; Copious dropsy; Effusions.
3. KIDNEYS: Fatty degeneration; Albuminuria.
4. SKIN: Eczema; Gangrene; General anasarca.
5. BLOOD: Disintegration; Haemorrhages; Serous Effusions.
6. HEART: Fatty degeneration.
7. CIRCULATION: Vaso-Motor paralysis; Asthenia.
8. LIVER: Fatty degeneration; Disorganization.
9. LUNGS: Asthma; congestion; Malignant Catarrh.

10. CEREbro-SPINAL SYSTEM: Motor and Sensory, Paralysis; Neuralgia.

If we logically understand the miasmatic aspect of *Aurum-met + Arsenic-alb*

Syphilis + Syphilis= Extremely Syphilitic

In short, *Aurum-ars* shows...

Depression with Restlessness

Depression expressing through Extreme Anxiety about Future.

Hopelessness. Self-destructive.

Critical of himself and constantly finding fault with others.

Hard, Conscientious but without much feelings.

CLINICALS

Anaemia

Cancer; Epithelioma; Induration in glands

Chlorosis

Syphilitic Headache

Lupus

Phthisis

Syphilis

AURUM-BROMATUM

Endogenous depression with acne.

Dissatisfied.

Everything is lived in the fantasy world, estranged from reality.

Indifferent to everything.

Nightmares and sleepwalk.

Fainting and Epilepsy.

Valvular diseases of the heart and hypertrophy

Migraine.

AURUM-IODATUM

If we will study the *Iodum* through the Physiological MM by Burt, we get following characteristics.

IODUM: PHYSIOLOGICAL MM

Through the vegetative nervous system, Iodine has fifteen special centres of action:

1. GLANDULAR SYSTEM: Hyper-Secretion; Atrophy (Iodism).
2. MAMMAE: Increased Secretion; Complete Atrophy.
3. OVARIES, TESTICLES: Stimulated; Complete Atrophy.
4. UTERINE GLAND: Increased Secretions; Atrophy.
5. THYROID GLAND: Great Hypertrophy.
6. LACTEALS LYMPH: Stimulated; Atony and Atrophy

7. SALIVARY GLANDS: Salivation without Fetor.
8. PANCREAS: Hyper-Secretion; Atrophy; Loss of Function.
9. LIVER: Stimulated; Atrophy; Emaciation; Jaundice
10. KIDNEYS: Tubular Nephritis; Albuminuria.
11. MUCOUS MEMBRANES: Congestion; Inflammation; Mucorrhoea.
12. SKIN: Acne-Like Nodes; Urticaria; Eczema; Anasarca.
13. SEROUS MEMBRANE: Plastic Inflammation; Effusion.
14. BLOOD: Anaemic; Fibrin Increased.
15. ARTERIES: Prolonged Arterial spasm.

***Aurum-iodatum*; PRIMARY ACTION**

HEART	THYROID
Oppression, Palpitation < at night < from exertion, warmth > in open air Flushed face with cold extremities Restlessness and deep depression Hypertrophy	Enlarged thyroid with protruding eyes Right sided goitre < From exertion, at night Depression with restlessness Feeling of a band around organs or parts

If we logically understand the miasmatic aspect of *Aurum* and *Iodum*.

Syphilis + Sycotic = Syco- Syphilitic

AURUM-IODATUM CLINICALS

Heart diseases; valvular, pericarditis, endocarditis, myocarditis.

Thyroid troubles, goitre.

Hodgkin's disease.

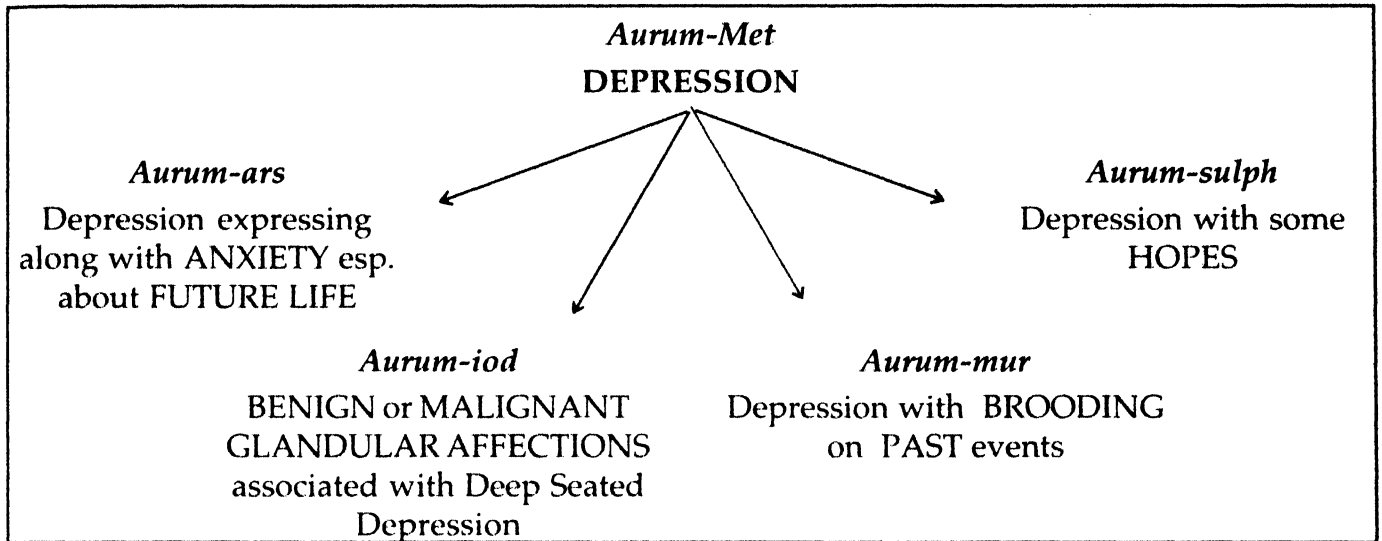

Cancer of: Liver, testis; Pains from metastasis to bones.

Paresis, senile.

In short, **AURUM-IODATUM** is benign or malignant glandular affections associated with deep seated depression.

AURUM-MURIATICUM: MONOGRAM FROM SELECT MATERIA MEDICA

CONGTSIVE	LYMPHATIC	EXUDATIVE
ULCERATIVE	DEGENERAT	SCLEROTIC
CANCEROUS	SCROFULOUS	SYPHILO-SYCOTIC

Noble Metals -far from

*Man, proud man,
Drest in a little brief authority,
Most ignorant of what he's most assured,
His glassy essence, like an angry ape,
Plays such a fantastic trick before high heaven
As make the angles weep.*

- **William Shakespeare**
Measure for Measure
Act II, Scene ii, 117.

The bard of Stratford-on-Avon – the abiding conscience of humanity – arrived at the above assessment sans AK-47, Atom bomb, or Agent Orange of the Vietnam War. A lot of water has flown down the Ganges to help thinkers to size up mankind a bit more surely; Edward Wilson, the Harvard sage-entomologist, has expressed that if the humble ant takes leave of the Earth because of the pesticide, mankind will be poorer by 100,000 on precious and edible plant species. But if man disappears because

of a final Atom-bomb-Divali, then the Earth will bounce back to her pristine beauty in 50 years. In Bronx Museum, New York, the upper gallery shows the most dangerous animal species, the top specimen being a full-length mirror, with the caption; “you are looking at the most dangerous species on the Earth.” When such men call some metals *noble*, chances are that Satan is passed off as the savior. Nothing has hurt Mother Earth, more than man disemboweling Mother Earth, for the lure of metals so dull and passive, as to seduce man into christening them as noble. Except dull, boring passivity, there is nothing noble about Gold, Silver, Platinum, Palladium and Co. Rarity has been mistaken as nobility.

This is a HydHel universe. The current estimate of the total number of the atoms in the universe is 10^{84} , 75% of which is Hydrogen, and 24% of which is Helium. Hence HydHel account for 99% of the
