AVAILABLE TOOLS

We are lucky to have more than two thousand medicines, plus the art of drainage remedies, Bowel Nosodes, Nosodes, Sarcodes, Bio-salts, Flower Remedies and so on. How are we making use of it? Of course, unless one knows about it, how can one use it?

Dr. Burnett has taught us the use of organ Remedies. It is sad that even many of the eminent physicians are not using this method, they feel that REPERTORISATION is the only method. A lady at the menopausal period was much improved under my treatment, but her 'prolapse uteri' was not getting cured? The symptomatic and constitutional remedies improved the vital force, but the damaged organ-uterus required direct help with Organ remedies. Under HELONIUS-Q she is making a rapid cure. Here Helonius tincture is given as an organ remedy, to tone up her weakened uterus. Similarly one can use Cephalandra Indica-Q, in diabetes alongwith constitutional remedies.

Another boy, taking medicines for Bronchial asthma improved eighty percent. But the boy was having itching in the bends of joints, and was passing lot of offensive flatus. Even the most accurate repertorisation was not improving this condition. From my experience I feel that most of asthmatic patients are having a lazy liver, the organ which produces anti-histamine. So I put the boy on Chelidonium-Q which not only improved his skin and stomach but his asthmatic condition also.

I could cure hundreds of patients with organ remedies. IF ONE HAS NOT READ ALL THE BOOKS OF THE GREAT MAS-

TER DOCTOR BURNETT, THEN ONE SHOULD FEEL GUILTY.

Also, are you using Drainage Remedies? If not, you are guilty. Nowadays, I never use Lycopodium without drainage remedies, such as Chelidonium -3 or 3X or 6 or with Berberis Vulgaris, lower potencies. In our books we read that Lyco is not a good medicine to start with! Why not use it, if indicated? But I am sure, there will be a severe aggravation if you give Lyco without Drainage Remedies because most of Lyco patients are having a bad liver with a tendency to urinary problems.

When we treat fever patients, the fever goes very high, and the child feels uneasy INITIALLY. My friend, Dr.K.N.PILLAI, has once taught me that if we can use SOLIDAGO- 3 alongwith Belladonna, Bryonia, Cina etc, fever will have a quiet beginning and end. Unfortunately, I could try only a few times this method, and every time I felt his statement may be correct. Of course this requires more research. What we Homoeopaths require is an open mind to accept any one's statements for research, without prejudice.

As the French school puts it - Solidago 3 is the best drainage medicine for most of our deep acting medicines like Sulphur, Phos etc. Wherever Graphitis is used in skin conditions and an aggravation is expected, it is better to use Ars Alb 30 following a single dose of Graphitis. Arsenic here in skin conditions, acts as an antidote and complement. Dr.Farrington in his clinical Mat Medica says that Ars is complementary to Graphitis in skin diseases.

A girl suffering from Gastroenteritis, admitted in hospital, was discharged and brought to me, as the progress in the hospital was not satisfactory. Vomiting is the chief complaint - vomits everything except cold water. She craves for ice water. Phos 200, three doses gave relief. But because of headache she felt restless and was crying. On enquiry, she had jaundice twice and was cured with 'specifics'. I have always found that if jaundice is cured with specifics only and treatment is not followed up, severe consequences like migraine, anorexia awaits the patient in future. Hospital report says she has no jaundice, no disease at all. Phos has only relieved her. She now requires an organ remedy which directly acts on the liver, and that remedy should be an antidote and complement to Phos. Finally Sepia-6, a single dose within five minutes relived her unbearable pain in head. Sepia was repeated, TDS, for three days for final cure. Here Sepia acted as a drainage remedy, though Phos was the indicated remedy. "The prac-

tice of Drainage consists in following or in preceding the principal indicated remedy by the application of one or more satellite remedies with the aim of facilitating the toxic elimination in a given morbid state, to check medicinal aggravation and to obtain more rapid and sure results"

Bowel Nosodes are my sheet anchors in chronic diseases. Wherever congestion is a key note, use Morgan-Pure. One of my chronic patient, suffering from piles, Rheumatism and congestion to auditory nerves was instantly cured with a dose of this Nosode. Whenever you treat asthma, skin diseases breakout. Again a recurrence of asthma comes and to interpolate any other drug may have an aggravation of skin disease or asthma. Here you may safely use this Nosode repeatedly in Sixth potency. Sycotic Co is excellent in Bedwetting and where Thuja or Medorrhinum fails. Proteus, Faecalis and all others have given me success a hundred times.

At time we have to treat patients whose mind is affected more than their body. But we don't get a clear cut picture of any homoeopathic

remedy. A girl, having no bodily complaints, was getting abnormal fear that someone may come and hurt her; also she felt her mind is losing control - Mimulus and Cherry Plum in a month cured her. Along with homoeo medicines, these medicines will help to have a speedy cure by creating positive thoughts. (Get the medicines from a reliable firm only)

Millesimal potencies are far effective than Centesimal Scale in certain diseases like asthma, Leucoderma, Migrane, Hypertension, Diabetes etc. Here the medicines can be safely repeated everyday. Nosodes like Syphillinum, Tuberculinum, Medorrhinum cannot be repeated too often in centesimal scale, whereas in Millesimal Scale any Nosode bears repetition well daily, and enhances cure. This I have very well proved in cases of Leucoderma, Migrane etc. In chronic diseases, no scale of medicine will help you as the Millesimal Scale - this is my experience.

By studying all the above subjects, our success goes higher and higher. Best of LUCK!

ANSWERS TO :

QUINQUINA CROSSWORD

- Across:**
1. Intertrigo
 3. Wilms tumour
 5. Haemophilia
 7. Cozen's test
 9. Lac Caninum
 10. Piriformis
 12. Nikolsky's
