

How To Study AIDS

Let us detail classification (analysis) of the selected rubrics with their grading symptoms (see Table 1). Out of ten, only two rubrics are under physical general; two rubrics under Pathological General; two rubrics under Pathological Particular and four rubrics under simple particulars. This work has been extracted from Dr R P Patel's analysis and evaluation of Rubrics/Symptoms of Dr Kent's Repertory of the Homoeopathic Materia Medica.

Now, we can calculate the accurate result of repertorization in numerical order up to 13 marks (7/13) in a repertory chart. I have also added 7 other important medicines (including miasmatic and non-miasmatic) in the abridged chart (Table 2) which are recommended by our experts for the management of AIDS.

Alphabetical arrangement of medicines are: *Agar* (9/16), *Ars* (10/26), *Ars-I* (8/17), *Bar-c* (7/15), *Bry* (10/19); *Calc* (9/20), *Canth* (9/15); *Carb-an* (7/16); *Carb-s*(8/15), *Carb-v* (9/25), *Carcinosin* (*Carc*); *Cham* (9/13), *Chin* (9/18), *Clem* (7/13), *Cocc* (8/14); *Con* (7/16); *Dulc* (8/15); *Ferr* (7/16); *Graph* (7/17); *Hall* (8/16); *Hep* (8/19); *HIV* (*potentised Humann Immuno deficiency Virus*); *Iod*(10/20); *Ip* (7/14); *Kali-ar* (7/13); *Kali-bi* (7/13); *Kali-c* (8/17); *Kali-s*(7/13); *Lach* (10/21); *Lyc* (9/23); *Med* (5/8); *Merc* (10/26); *Nat-m* (9/19); *Nit-ac* (8/19); *Nux-v*(7/14); *Phos* (9/21); *Phos-ac*(8/16); *Phyt* (4/5), *Psor* (8/16); *Puls* (8/17); *Rhus-t* (7/18); *Sep* (8/18); *Sil* (9/22); *Stram* (8/13); *Sulph* (10/27) *Syph* (1/2); *Thuj* (7/16); *Tub* (1/3); *Vanadium* (*Vanad*); *Verat* (8/15) and others may rescue and give succour for the AIDS treatment.

Let us come to the point of Miasms in AIDS through selected rubrics (see Table 1). In this workout case, Psoric symptoms are more prominent than Sycosis. This work has been extracted from Dr R P Patel's Chronic Miasms in Homoeopathy and their cure with classifica-

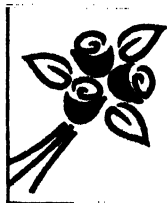

tion of their rubrics/symptoms in Dr Kent's Repertory. As per Dr Hahnemann, we can say that this case of AIDS is a two fold complication, ic Syco-Psoric. Although the highest scorer *Sulphur* covers not only Psoric miasm but also covers Sycosis, Syphilis and Tubercular miasms. In this way we can consider four miasmatic (Anti-Syphilitic, Anti-Sycotic, anti-Psoric and anti-Tubercular) medicines which came out after reportorial filter. It has been extracted (see Table 2) from the Index Part of Dr S M Gunavante's Introduction of Homoeopathic Prescribing (1st ed.)

Another two columns have been arranged in this abridged chart (Table 2) for the benefit of our colleagues to scrutiny of THERMAL (A=Ambithermal, C=chilly & H=Hot) and duration of action (in days) of the medicines at a glance which is also extracted from Drs Tyler and Weir's Repertorization and from Dr R G Miller's 'Relationship of remedies' respectively.

Now come to the practical point in the treatment of AIDS. Firstly, we Homoeopaths, get very little scope to treat AIDS in our clinic, OPD even our hospitals and/or Research Centers. Secondly, AIDS diagnosed patient and his/her family never consults first with us for Homeopathic treatment. Thirdly, in the beginning of the 21st century, we are still fearful regarding the name AIDS and also believe that AIDS is a very contagious disease. Our global society neglects the AIDS patient, even their families too suffer neglect ignoring and shame. Not only that but sometimes our medical profession also avoids AIDS patients at the Nursing home or Hospital. Is it not a shame?

In this situation we should come forward for the AIDS sufferer and also his/her family. Firstly, we need to conduct a programme for the awareness of AIDS and its proper management. Secondly, I like to appeal to our higher authorities to open a separate department in each Central or Regional Homoeopathic research centre.

Where AIDS (our heart throbbing phobia) can get succor in the last resort by the potentised Homoeopathic medicines.
