

ERRATUM

Erratum to “Believing in order to understand: Hahnemann’s hierarchisation of values” [Homeopathy 97(2008) 156–160]

JM Schmidt*

Department of the History of Medicine, University of Munich, Germany

It is with regret that on p. 157 the text that appears:

The typical question of philosophers of nature at that time, such as Schelling, was: How must nature, spirit, matter, the organic and inorganic, etc. be thought (constructed) in order to – on the one hand unravel the relation of these notions and, on the other hand, enable none to conceive of oneself as a moral and spiritual being?

Should have read:

The typical question of philosophers of nature at that time, such as Schelling, was: How must nature, spirit, matter, the organic and inorganic, etc. be thought (constructed) in order to – on the one hand unravel the relation of these notions and, on the other hand, enable one to conceive of oneself as a moral and spiritual being?

Replacing the “none” with “one”.
