

# AIDS Repertory

(Editor: This is a carry forward from previous issue as promised).

This repertory on AIDS is offered to homoeopathic fraternity with a view to present our armamentarium in a more powerful and meaningful way, as AIDS dragon is impinging relentlessly on humanity today. The repertory is prepared with Kent (K), Synthesis (S), Synthetic (Sy), Boger-Boeninghausen (BBCR), Murphy (M), Complete (C), Tarkas (T-unpublished work) repertories and my own additions.

All Capitals - 3 marks, First letter capital - 2 marks and all small letters carry 1 mark.

THE CAGE DOOR

A fable tells about two birds, each in a cage with food and water. One bird rebelled against his conditions, rejected the food and kept knocking his head against the cage door. A few hours later, he died of his injuries. The other bird said, "Nothing's worth dying that way. Let me enjoy the food and water and be grateful for the little space in which I can fly." At the end of the day, the master came to free both birds. But only one was ready and able to enjoy freedom while the other lost it once and forever.

Our life may get trapped in a cage. Closed doors might be health problems, job problems, financial limitations, feeling of rejection and insecurity, marriage problems, inability to meet your life partner, etc. If we focus on the closed door, we will eventually act like the poor bird. But if we enjoy our life the way it is granted, we will eventually be freed.
