

# Case of Multiple Warts

**ABSTRACT:** Often we come across cases where the physical state is because of the turmoil going on at the mental sphere. The right remedy not only cured the warts but also lead to general well being of the patient.

No H/O Leucorrhoea

## MENTALS

Quiet disposition

**WEEPING TENDENCY:** EVEN DURING CASE TAKING SHE WAS CRYING.

## SENSITIVE TO EXTERNAL IMPRESSION

Does not like to back answer anybody She feels alone when she is in college though she is with friends She has limited friends she was supposed to get married in her relation but due to some family Problems and also due to her warts that relation got broke off. After that she was always thinking regarding past incidence after her marriage broke off she developed multiple new warts and increase in size of existing warts She does not like to share any personal feelings with any body even to her friends or mother. Always after her college she is in her room alone

For all these problems she blames her self .and she is not having confidence to do any thing Very shy and mild nature and always thinks that she is having some disease
