

Medorrhinum-the Multipolycrest Missile

Medorrhinum-the Gonorrhoeal virus, a misnomer (coz it is a gram negative coccus/bacteria carrying a sycotic taint) is a multipolycrest missile and has within its armamentarium a host of polycrest remedies. To perceive the drug holistically, we have attempted to extract out the different facets or essence of other polycrest remedies, which together form a complete *Medorrhinum* picture. We have scanned as many *Materia medicas*, source books and authentic repertoires on which we could lay our hands upon. It was an enriching experience for us to perceive this wonderful drug and we believe that it shall be for you too. Apart from having its own individualistic symptoms in its provings, we found many one-liners (keynotes) matching with other drugs, but here we have included only those which have their essence in *Medorrhinum*.

ARGENTINUM-NITRICUM FACET: Mentals:

- A) Emotions-apprehensive, restlessness, confusion, hurried feelings, impatience, time passes too slowly.

INFINE

An attempt has been made to compile the essence of as many polycrests in *Medorrhinum* as we thought fit.

After this exercise, one may conclude that *Medorrhinum* is not only a multipolycrest remedy but has compatible relationship with the above mentioned polycrests and may follow them well when the above fail to act.
