

## BUILDING UP BABIES

Lizzie Gray Guthers

Dr. Lizzie Gray Guthers says of babies : "Many a case of weak ankles, curvature of the spine, softening of bones, etc., has been cured by the *Calcareas*, *Silicea*, *Sulphur* and kindred remedies without steel, buckle and strap, or the inevitable plaster-jacket."

### CRYING CHILDREN

(105) **Case 1** : Scald head in an infant three weeks old. The child cries day and night, cannot be quieted even by being carried about. It drives the parents wild, and they want to know if something cannot be done for the poor thing. Having treated the father several years ago for gonorrhoea and knowing his outs, I at once prescribed *Medorrhinum 200*, which, to my great surprise, gave decided relief. I followed this with *Calc. sulph. 30* as an intercurrent remedy with good success.

(106) **Case 2** : In this case both father and mother had been subjects of gonorrhoea. The child screams day and night. It cries itself to sleep and awakens crying ; cannot be pacified at all ; hands clenched and striking against its head. After nursing throws up its milk, which is sour and curdled. Prescribed *Medorrhinum 200*. The child was quieted at once by the remedy and my faith in it was much stronger.

(107) **Case 3** : I will give still another cure of twin girl babies, who commenced to cry from the time they were born into the world. I gave them a few pellets of *Medorrhinum 200*, as I knew the father and mother were old subjects of gonorrhoea, and I had no hesitancy in prescribing the remedy.
