### PHYSICAL EXAMINATION

Poorly built and nourished

No pallor, cyanosis, clubbing

Weight: 37 kg. BP- 120/80 mm of Hg

P/Abdo: No organomegaly or tenderness

P/Vaginal: Wetting of the undergarments++. No offensiveness or any growth or eruptions.

### Diagnosis: Chronic Cervicitis with Grand Mal Epilepsy

### ACUTE TOTALITY

Leucorrhoea: Whitish, profuse, copious watery, < after menses, weakness<sup>3</sup>

Rx: *Kreosotum D/D: Borax and Puls*

### CONSTITUTIONAL TOTALITY

#### MENTALS

Reserved

Brooding

Insecurity feeling

#### PHYSICALS

Lean

Appetite – decreased

Thirst – increased

**Dr VILMA D'SOUZA**  
Asst. Professor  
Dept of OBG  
Fr. Muller's Homoeo Medical College,  
Mangalore

Fear

Consolation >

Dreams: frightful

#### CHARACTERISTIC PARTICULARS

Leucorrhoea profuse sticky, watery with weakness

Convulsions with unconsciousness

Menses early with clots and backache before and during menses

#### REPORTORIAL TOTALITY (SYNTHESIS REPERTORY)

P 108 Mind – Fear – dark of

P 181 Mind – Reserved

P 27 Mind – Brooding

P 140 Mind – Insecurity–mental

P 1464 Dreams – frightful

P 653 Stomach – appetite – diminished

P 920 Female genitalia - Leucorrhoea – white

P 916 Female genitalia – Leucorrhoea – copious

P 918 Female genitalia– Leucorrhoea – menses – after

P1587 Generals–convulsions–sleep-deep/ sleep– after

P1582 Generals–convulsions–consciousness–without

P1706 Generals – weakness- leucorrhoea -with

#### REMEDIES

*Calc-carb* – 23/10

*Alum* – 14/8

*Nat-mur* – 18/9

*Puls* – 14/8

*Causticum* – 16/10

*Sil* – 14/8

*Lyc* – 16/10

*Sep* – 14/7

*Phos* – 15/9

*Graph* – 14/5

#### PDF

Chilly patient

Thirst increased

Caries teeth<sup>2</sup>

Menses too early

#### TREATMENT

*Calcarea-carb* chosen but pt Hot so *Calc-iod*.

D/D: *Nat-mur*: Ruled out because- pt > by consolation.

#### FOLLOW-UP

Did well in just a few weeks.

## A Case of Asthma and Warts

“HUMAN SENSITIVITY”: “Understanding human sensitivity has been a quest for many. And coming down to fathom human sensitiveness is an experience by itself”!

This case dates back to 2000 and defies repertorial totality, as the prescription is based on understanding human adaptation of the animal sensitivity with its survival mechanism in nature.

It was then a coarse attempt, which has refined greatly now with the study of kingdom analysis.

Achieving this depth in each case persistently is not easy, but the struggle is worth its weight in gold.
